

Bamboo
BY LOGAN LEIGH

The new green steel proving to be a cost effective and sustainable alternative.

WHY BAMBOO

Now more than ever, there is a greater demand for building and manufacturing materials to have a reduced carbon foot print. Today's building industry demands sustainable products and Bamboo is fast becoming the most Eco friendly and sustainable natural fiber in the world. Not to mention cost effective and a comparable alternative.

Due to its fast growing nature, a Bamboo forest has twenty times the yield as a similar hardwood forest. As one of the fastest growing plants in the world, bamboo can be harvested within 4-5 years, while hardwoods take 30-40 years to harvest.

The development in treating and laminating Bamboo has increased the scope it can be used for. Not only is Bamboo incredibly strong, in fact it is referred to as 'green steel' and has better tensile strength than most other materials, it is also versatile, anti-bacterial, durable and resistant to termites.

It's versatility enables it to be used in many situations from stairs, bench tops, beams, vanities, shelves and cabinetry. While it's natural appearance is guaranteed to suit many styles, bringing warmth and elegance to your home.

At Bamboo By Logan Leigh we pride ourselves in the integrity of our product, our workmanship and our environment.

WHY BAMBOO BY LOGAN LEIGH

Established in 1982 by existing owners David and Gay Embury, Bamboo By Logan Leigh has over 36 years experience in the kitchen and joinery industry.

Having invested time and money into the research and development of Bamboo products, we are the first to develop our Bamboo product list, becoming specialist in our field and at the forefront of Bamboo manufacturing.

Over the last 3 years we have won 12 Business Chamber awards, including 2016 Excellence Innovation and 2016 Excellence in Sustainability and 2016 Business of the Year . We are also a proud member of Bamboo Society of Australia.

We have participated in numerous trade shows including the HIA Sydney Home Show, with an over whelming response and interest from industry leaders, builders and the general public.

For your ease and convenience, we are able to supply directly across Australia from the Logan Leigh factory and showroom in Taree, NSW. All orders are carefully packed and delivered in a solid crate to prevent damage.

Our product is custom made, crafted with care and of a very high standard. It meets and exceeds customer expectations for quality, value and performance.

BAMBOO BENCH TOPS

Our kitchen bench tops have proven to be very popular and are available in lengths up to 4.2 meters without a join.

We recommend a full fabrication and polishing service to your exact specifications, so bench tops arrive ready for installation.

Alternatively, we provide bare sanded slabs for the DIY or trade market. We advise that these bench tops be spray finished with two-pack polyurethane for complete sealing.

We custom make benches to suit any kitchen design.

Our adjustable bracket system allows for variable staircase pitches.

BAMBOO STAIRCASES

All stair cases are custom made to your plan for easy installation by us or your builder or carpenter. They are competitively priced, eco friendly and a great alternative to steel fabricated staircases.

Our beautiful mono stringer staircase had an immediate impact at the HIA Home Show. The mono stringer beam was developed in conjunction with the Engineering testing facility at Newcastle University.

Bamboo By Logan Leigh designed and patented the stylish steel brackets that support the Bamboo treads onto the mono stringer beam.

Our adjustable bracket system allows for variable staircase pitches and are available in four stock colours, or they can be customised to a colour of your choice. In addition we can also supply custom Bamboo handrails, posts and landings.

BAMBOO POSTS AND BEAMS

Our Bamboo posts and beams provide an attractive alternative to steel and timber, bringing a contemporary and modern look to homes.

The beams are available in lengths of up to six meters, and have been structurally tested by Newcastle University guaranteeing strength and durability.

Structurally tested and developed with Newcastle University.

Integrity in our product, our workmanship, our environment.

Customised to suit many functions, Bamboo's versatility is endless.

BAMBOO'S VERSATILITY

From doors, bench tops, beams, stairs, cabinetry and bathroom vanities, we have explored the unsurmountable versatility that Bamboo offers and its inspirational qualities.

A perfect substitute to traditional surfaces like laminex, stone, steel or hardwood, Bamboo provides a natural warmth, while maintaining durability.

All products can be custom made to suit your individual needs and requirements.

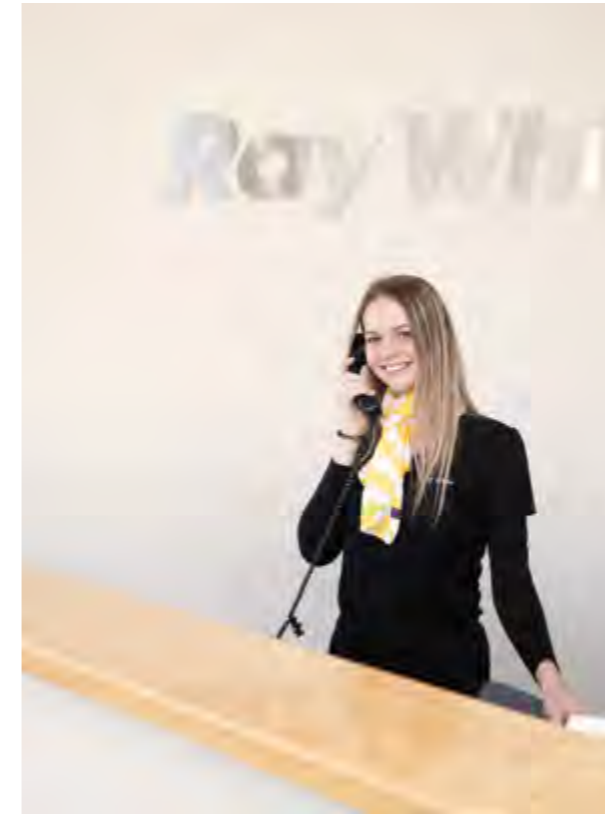

It's eco sustainable quality has proven to be favoured amongst builders, architects, interior designers and home renovators.

Bamboo brings style and sophistication to commercial settings.
